

For Immediate Release:

**iHAMMS Suite of Software Solutions
for Hotel & Airline FFP Administration
& Management Announces Newest Product -
iHAMMS FrontDesk®**

Orlando, Florida, USA – 25 September 2007 - Marker InfoComm Inc, the world's largest independent provider of web-based software tools to hotels for airline frequent flyer program administration, is pleased to announce the successful completion of beta testing of its newest software product, iHAMMS FrontDesk®.

iHAMMS FrontDesk® has been in use for over 9 months in Germany at the business travel heavy Steigenberger Hotel Frankfurt Airport and the response has been excellent. iHAMMS FrontDesk® allows hotel staff at busy front desk environments to scan a hotel guest's frequent flyer card for instant data collection for airlines around the world.

A Chicago based Hotel has also been testing iHAMMS FrontDesk® with similar results.

Kirk Stephens, President and CEO of Marker InfoComm said, "Our new desktop workstation tool is designed to run in the background for hotel staff in the fast-paced front desk positions. This tool also includes an integrated smart universal card reader to swipe magnetic striped airline cards from any airline in the world for collection of Frequent Flyer data from customers who present such cards at check-in/check-out time."

Marker InfoComm, which is located in Altamonte Springs, Florida, manages many loyalty programs for nearly 2000 hotels worldwide and provides connectivity with 33 airlines. Marker clients include American Airlines, Delta Air Lines, New Otani Hotels of Tokyo, Japan, Nikko International Hotels of Tokyo, Japan, Althoff Hotels and Residences of Cologne, Germany, Coral International Hotels, Resorts, & Spas of Dubai, WorldHotels of Frankfurt, Germany, Leading Hotels of the World of New York City, Millennium Copthorne Hotels and Resorts of London and Singapore, and Dallas based Neiman Marcus.

Marker InfoComm has also recently launched a website specifically related to its iHAMMS Suite of Solutions and can be accessed at <http://www.ihamms.com> iHAMMS is an acronym for International Hotel Airline Mileage Management System and now offers four distinct products to support hotel and airline partnerships worldwide.
